

Payoff Estimator (1/4)

1) First, you choose a V2G schedule you are interested in following.

Choose a V2G Schedule

MTWTF , 6-9 p.m.

\$ savings/year

Sa, Sun , 6-9 p.m.

\$ savings/year

Every day, 6 - 9 p.m.

\$ savings/year

Payoff Estimator (2/4)

2) Then, enter your car's make and model. Compatible equipment installation packages and costs will then be shown to you.

A hand-drawn diagram of a web form. At the top, a box labeled "Vehicle Details" contains two input fields: "Make" and "Model". An arrow points down from this box to the text "Compatible Installation Packages :". Below this text is a table with two columns: "EQUIPMENT" and "\$ COST".

EQUIPMENT	\$ COST
-----------	---------

Payoff Estimator (3/4)

3) Using the cost of this equipment installation package and the schedule you choose at the beginning, you will see a graph that estimates the amount of time before you pay off these initial equipment costs and start earning on V2G.

Payoff Estimator (4/4)

4) You can get a better sense of how long you might need to participate before breaking even on installation costs and can decide whether that timeline would work for you.
